

Dear Fellow Graduate Students,

I am Kumar Danam, and I am running for Vice President of Programming and Outreach for the University of North Texas Graduate Student Council. I'm excited to do this because I love bringing people together and designing special events that enrich students' lives and unite them.

I was the Student President in my undergraduate years and I organised several events such as cultural events, sports tournaments, and technical workshops. I gained knowledge of event organisation and planning, communication with different student groups, and creating a good experience for everyone. Currently, being a graduate student, I would like to utilise this experience to improve our student community.

If I am elected, my mission will be to conduct events that are beneficial to students both professionally and personally. I would conduct networking sessions, guest lectures, and workshops that would help students prepare for their future. While doing so, I would like to also conduct fun as well as social events that enable students to mingle with one another, learn about different cultures, and enjoy their college life. I also wish to develop strong ties between students, communities, alumni, and business people to realise new opportunities for everyone.

I personally think that every graduate student deserves to be heard and cultivated. If elected, I will see that our council listens to students and moves to improve campus life. Together, we can develop a more connected and supportive graduate student body at UNT.

I would be honoured to have your support and vote. Let's make a difference together!

Thank you.

Kumar Danam
